

**CROSS COUNTRY
GREENHOUSES**

HOBBY AND CUSTOM

**OUR GREENHOUSES ARE
BUILT TO OUTPERFORM AND
OUTLAST THE COMPETITION**

STRENGTH

Our greenhouses are rated for 85 mph winds and 32 psf for snow.

VERSATILITY

Custom modifications and special requests are why people choose us.

QUALITY

Included weather-resistance system that includes "gap free" capping system, foam gaskets, and draft seal weather stripping.

LIFETIME WARRANTY

For over 68 years, we are proud to offer the best lifetime warranty in the business.

**DESIGN YOUR OWN
GREENHOUSE**

Imagine designing a greenhouse that will last forever. Your choice of style, glazing, pitch and decorative features are just a few of the options available to you.

PACIFIC GLASS GREENHOUSE

Genuine bent tempered glass is integrated into the design of the greenhouse. Our continuous exterior capping system holds the glass securely for a draft-free, weather tight greenhouse.

PACIFIC POLYCARBONATE GREENHOUSE

A true working greenhouse, the twinwall polycarbonate provides perfect light transmission for optimum plant growth and has built in UV protection that keeps your greenhouse looking clean and beautiful for decades..

TRADITIONAL GLASS GREENHOUSE

Our most popular model since 1951, the Traditional greenhouse is the perfect slope to reduce heating costs and maximize floor space.

TRADITIONAL POLYCARBONATE GREENHOUSE

Consistent light diffusion and even temperatures create a nurturing controlled environment for your plants year round.

CAPE COD GLASS GREENHOUSE

The Cape Cod design adds refinement to any setting. Home to seating areas, water features and hot tubs, the high pitch creates more living and growing space for your family.

CAPE COD POLYCARBONATE GREENHOUSE

Are you considering a raised wall for your greenhouse? Take advantage of our free option to drop the door to ground level for a more permanent, stylish look.

COTTAGE GLASS GREENHOUSE

Are you hoping to mix and match glazing to optimize light transmission? The twinwall polycarbonate in the roof of this beautiful greenhouse protects from possible falling branches and provides additional energy efficiency year round.

COTTAGE POLYCARBONATE GREENHOUSE

The interior framing of the greenhouse is designed for limitless staging. An interior bolt track system allows gardeners to hang baskets or shelving wherever they would like. Each roof bar can withstand a 50 pound hanging basket.

HOME-ATTACHED GREENHOUSES

Are you looking for more affordable living space? A home-attached greenhouse is typically 40% of the cost of an addition onto your home. The light filled room becomes the most loved space in the home.

HOME-ATTACHED GREENHOUSES

Your ideas are the first step for our designers. We work with you to create a space that brings beauty and joy to your home.

MERIDIAN ESTATE GREENHOUSES

This is your dream come to life. Whether it is a garden oasis, a place to entertain or added living space, we will work with you to meet any custom requirement.

MERIDIAN ESTATE GREENHOUSES

Be inspired to create a place to protect tender plants from the elements and enjoy a sanctuary to listen to the rain, enjoy a warm latte and connect with nature.

MERIDIAN ESTATE GREENHOUSES

Enjoy nature and all that the seasons have to offer in your beautiful conservatory.

MERIDIAN ESTATE GREENHOUSES

An inviting place to meet friends, this popular restaurant features a double glass conservatory for guests to enjoy a meal.

CROSS COUNTRY COMMERCIAL GREENHOUSES

Our premium aluminum greenhouse frame with heavy duty construction takes half the time to install compared to a typical steel structure. We provide the full spectrum of benefits available in greenhouse design today.

CROSS COUNTRY COMMERCIAL GREENHOUSES

Our innovation in design pairs perfectly with increased interest in rooftop greenhouses. Our open and low profile truss systems provide unparalleled strength and offer the ultimate protection from the elements.

FRAMING SYSTEMS

CROSS COUNTRY FRAME

Our standard greenhouse aluminum frame is ideal for hobby residential and commercial greenhouses that require a permanent structure which complements an existing landscape. The Cross Country greenhouse frame can withstand 85 mph winds and 30 pounds per square foot for snow loads. Mix and match glazing to suit your growing needs.

MERIDIAN ESTATE SUPERIOR FRAME

The Meridian Superior frame offers a more substantial appearance as well as structural strength without the look of exposed exterior hardware. The Meridian Superior frame is a popular choice with homeowners who wish to match the design of their home and create a beautiful living and growing space.

MERIDIAN ESTATE LUXURY LINE

Our Meridian Estate Greenhouse line is the ultimate in elegant design. Thermally upgraded, the framing system allows for enjoyment in every season. Three different sizes of aluminum glazing bars (3", 5" and 6") guarantee the design of your dreams. Great care is taken to create a finished appearance providing a clean, high style effect without the look of exposed hardware. This collection affords the choice of any glazing option including high performance, tinted and double glass.

GLAZING SYSTEMS

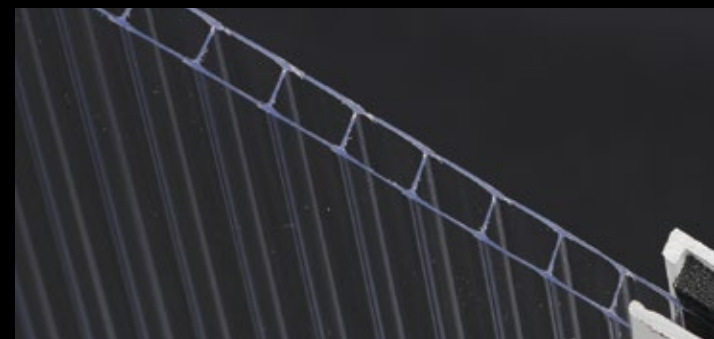

SINGLE GLASS GLAZING

Our tempered single glass offers full light transmission for greenhouse gardeners that want the capability to control all growing variables, and the safety of tempered glass to minimize any possible breakage. 3 MM (R Value) .90

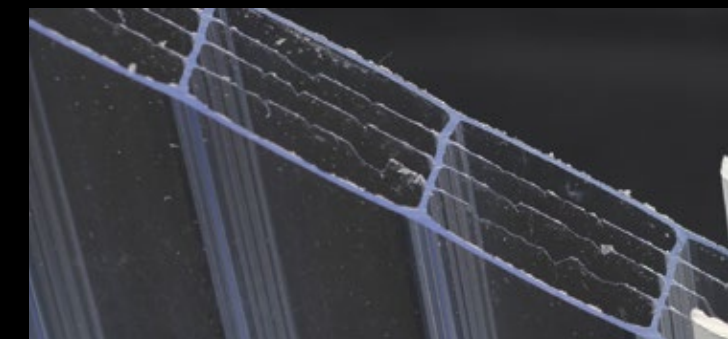

DOUBLE GLASS GLAZING

Our tempered insulated double glass has all the benefits of single glass with an insulation factor optimized for full service use in cold climates. 16 MM (R Value) 2.04.

TWINWALL GLAZING

Our twinwall polycarbonate provides the benefits of 50% better insulation compared to single glass, 80% light diffusion for built in shading and cooling, and is virtually unbreakable. 6 MM (R Value) 1.59, 82% Light Transmission.

FIVEWALL GLAZING

Our Fivewall polycarbonate glazing has all the benefits of twinwall polycarbonate, while offering an insulation factor that is 80% more efficient than the twinwall polycarbonate and 50% more efficient than double glass. 16 MM (R Value) 3.0, 62% Light Transmission.

OTHER OPTIONS: High Performance including Low E or Laminated glass ~ Tinted, Etched, Opal or Bronze.
